

APPRETTO

Liquid wax and resin-in-water based emulsion used for finishing the leather uppers.

APPRETTO

Liquid wax and resin-in-water based emulsion used for finishing the leather uppers.

You can:

- use it by hand with a sponge;
- spray it.

Do not exceed with the product's amount.

Get a self-polishing effect after drying. Anyway, to improve the gloss effect, smooth the upper with a wool-brush impregnated with carnauba.

A large range of colors is available
