

## IDROTAC

Resin-in-water based solution used as a primer for finishing leather, wooden and masonite heels.

## IDROTAC

Resin-in-water based solution used as a primer for finishing leather, wooden and masonite heels. It can be also used on the edges of leather soles in order to get a better finishing effect.

Buff the surface with a P120 grain-size buffing paper, then apply **IDROTAC**.

You can:

- use it by hand with a sponge;
- spray it on the packed soles;
- apply it with an automatic machine.

Do not exceed with the product's amount.

Let the surface dry then buff it with a P180 grain-size buffing paper.

Now the surface is ready for our wax-dyeing product **UNIVERSAL**'s application.
