

SFORMATURA

Liquid wax and resin-in-water based emulsion for the finishing of buffed leather soles.

SFORMATURA

Liquid wax and resin-in-water based emulsion for the finishing of buffed leather soles.

Stir it before applying it on the buffed surface.

You can:

- use it by hand with a brush or a sponge;
- spray it;
- apply it with an automatic machine.

Do not exceed with the product's amount.

Let the surface dry and then smooth it with a cotton wheel-brush impregnated with light-abrasive wax. Polish it using a wool wheel-brush impregnated with carnauba or synthetic wax.

A large range of colors is available.
